Orchestrator (Python, FastAPI backend)
Next.js web frontend
FastAPI REST API
Evaluation harness run_eval.py
Response: action, answer, evidence
1. Active dataset and KPI catalog
2. Planner and plan validator (typed plan)
3. SQL compiler; safety, schema and fidelity checks
4. Read-only SQL execution
5. Result, KPI and fulfilment checks
6. Evidence record; nine-signal confidence
7. Decision (four actions); explanation
8. Semantic verification (step 12b, gated; Fig. 2)
SQLite databases: demo sales data; uploaded datasets
MCP tool servers (implemented)
Optional LLM client (off in all reported runs)
exercised by the reported evaluations (the harness calls the orchestrator directly)
implemented, not exercised
Four actions: ANSWER, WARN, CLARIFY, ABSTAIN
